CENA South Australia Event

Plaster 1 Day Workshop

Option A - 19th June

OR

Option B - 20th June

[Register to Attend Plaster Workshop](#)

This one full day workshop will include didactic and practical sessions about lower arm and leg fractures. You will learn how to apply back slabs and full casts. We will be using the following products - Dynacast Prelude and Plaster of Paris. A session about discharge advice and practicalities will complement the day. This day is largely a practical event - wear old clothes!

The workshop will be presented by John Kinelay from Smith & Nephew and Emergency Nurse Practitioners from Adelaide.

John is a very experienced Orthopedic Technologist from Victoria. He has extensive work and teaching experience in this field and is delighted to share his skill and knowledge with us.

The Emergency Nurse Practitioners are all currently working in ED's in South Australia. They are very experienced at caring for patients with arm and leg injuries which require plaster. They have offered to come along to share some practical tips with you!
